Description

The Wells Cargo CompacVan (gooseneck trailer) is the largest model we build with body lengths up to 48'. When teamed up with a one-ton truck, you've got a rugged combination to tackle the really big jobs. The CompacVan is no stranger to hard work. Its gooseneck trailer design provides superior road stability, substantial cubic capacity for high volume loads and GVWR's ranging from 14,700 to 22,500 lbs. Developed specifically for industrial and commercial applications, long lasting durability is engineered from the ground up. The real difference is in the details; reinforcing gussets at all major stress points, weather protected brake wiring, and door hinges with grease zerks. You won't find a longer lasting trailer or one that requires less maintenance . . . period!
